

## **PCB INVESTIGATION UPDATE FOR 4/20/2007:**

**...bringing you the latest developments in the ongoing investigation and elimination of the PCBs found in the 10 Mile Drainage District and the Lange and Revere canals.**

**On April 16th the City met with representatives of the Macomb Public Works Office and environmental consultants and engineers to review the monitoring plan submitted by the Department of Environmental Quality (DEQ). Based on our discussions, we feel that the proposed monitoring plan needs adjustments in some areas of concern.**

**As most residents will remember the Environmental Protection Agency (EPA) spent millions cleaning out the drain and canals a few years ago. It was later learned that an active PCB contamination was still present.**
